

The New York Regional Information Centers (RICs) are hosting a webinar to help enable vendors easily adopt a new solution for data interoperability, RIC One API. This training will enable you to rapidly build a client that connects to the RIC One API. RIC One API is an implementation of SIF xPress Roster, a new, non-proprietary, and open standard for roster data exchange.

This hands on webinar will focus on providing you with instruction and exercises that will allow you to build an API client for your product using freely available client libraries for the Java and .NET platforms.

Following is the planned agenda for this webinar:

1. RIC One API Introduction

What is RIC One API?

How is RIC One API deployed?

2. xPress API Overview

Where do I access it?

OAuth and Handshake Sequence

API semantics

Resources/data model

Service paths

JSON and XML

Exercise 1: Use CURL to Interact with the API

3. xPress Client Library Overview

Class overview

Dependencies

Adding it to your project

Exercise 2: Build a Command Line Client

4. Questions and Answers

5. Next Steps

RIC One API Benefits for App Developers

- Utilize a national, open standard instead of proprietary API solutions
- Make your applications work better overall by securely obtaining data on demand
- Decrease your long term support costs by standardizing access across districts and Student Systems
- Simplify access while increasing customer satisfaction
- Eliminate legacy, labor intensive methods of data transfer

To RSVP, please complete this form:

If you have any questions or would like more information, please email Madalyn Romano at mromano@lhric.org.

To ensure that we can address the needs of all attendees, space is limited to 15 virtual participants. After your registration is confirmed, additional information will be provided about how to prepare for the webinar.

For additional information about RIC One, please visit www.ricone.org.

**Please join our LIVE webinar
via GoToMeeting on
Thursday, August 11 from
12:30PM - 3:30PM EDT.**

GoToMeeting details will be provided after you register for the webinar using the link above.
